MOTAZ FERAS ABOASSI

Software Engineer — Front-End Development

Damascus, Syria | +963 998 548 589 | motazaboassi@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Front-End Software Engineer and 4th-year Informatics Engineering (AI specialization) student at Damascus University, with hands-on expertise building scalable, responsive web applications using React, TypeScript, and modern UI frameworks. Proven ability to design interactive user interfaces, optimize real-time data flows, and implement complex algorithmic logic, including 3D physics simulations. Active open-source contributor and technical volunteer with a strong foundation in modern web architecture and UI/UX optimization.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Frameworks & Libraries: React.js, Material UI, Tailwind CSS, Shadcn/ui, Bootstrap, Framer Motion

Tools & DevOps: Git, GitHub, Docker, Linux (Kubuntu), Postman

PROJECTS

3D Billiard Physics Simulator / *JavaScript (ES6+), Three.js, WebGL, HTML5 Canvas* | Live Demo | GitHub

- Engineered an interactive 3D physics engine running entirely in the browser, implementing rigid-body dynamics, elastic collisions, and rotational damping in real time.
- Resolved high-speed frame overlap issues and optimized the render loop to achieve stable 60 FPS performance.
- Applied academic concepts from numerical analysis and computer graphics to bridge theoretical mathematics with practical web rendering.

Assistant Dashboard for Clinic Secretary (CMS) / *React, Tailwind CSS, Shadcn/ui, Drag-and-Drop* | Live Demo | GitHub

- Developed a comprehensive Clinic Management System to automate daily administrative tasks and streamline communication between doctors, patients, and staff.
- Integrated a drag-and-drop scheduling interface, reducing appointment booking time and mitigating scheduling conflicts via real-time sync.
- Enabled instant multi-user notifications and automated PDF/Excel daily reporting for doctors' schedules.

Master Communication Platform / *React, Material UI, Framer Motion* | Live Demo | GitHub

- Built an interactive learning platform featuring smooth UI animations and responsive design to teach professional communication skills.
- Designed an assessment module providing instant quiz results with detailed error explanations and source referencing.

Shopping Goods (Nike E-commerce Template) / *Pure JavaScript (ES6+)* | Live Demo | GitHub

- Developed a fully functional e-commerce web application focused on vanilla JavaScript logic, state management, and DOM manipulation without external frameworks.
- Implemented instant filtering and a dynamic wishlist feature to elevate user experience.

PROFESSIONAL EXPERIENCE & VOLUNTEER WORK

Front-End Web Developer (Volunteer) Present

Med Life Syria LinkedIn

- Contributing to the front-end development of medical and community-focused web platforms, ensuring high responsiveness and optimal accessibility.

Front-End Developer (Volunteer) Present

Solarise

- Assisting in the implementation of web interfaces and clean UI components to support sustainable energy initiatives.

CERTIFICATIONS & TRAINING

- Front-End Web Development Diploma (React JS) — SEF Academy, Score: 96.73%, 6 months (Dec 2024). Advanced training in Semantic HTML5, CSS3, ES6+ JavaScript, Component-Based Architecture, React Hooks, and State Management (Redux Toolkit). Certificate
- HTML, CSS, and JavaScript for Web Developers — Johns Hopkins University (Coursera), Verified BDA2I089H4BV, Feb 2026. Coursework covering responsive design, DOM manipulation, and core web application mechanics. Certificate

EXTRACURRICULAR ACTIVITIES & HACKATHONS

- Participant, "Environment Innovates" Environmental Hackathon (IBTKRGO & RECO), July 2026 — Developed a prototyping solution addressing rural non-potable water scarcity during a 3-day innovation challenge. Certificate
- Participant, Al-Khwarizmi Fellowship Program — Advanced through selective stages of a STEM and Computer Science research fellowship, completing intensive AI training modules. Link Post
- Workshops: Internet of Things (IoT) and Artificial Intelligence Applications in Environmental Systems (June 2026). IOT AIAE

EDUCATION

Bachelor of Science in Informatics Engineering — Artificial Intelligence Specialization
Damascus University, Faculty of Information Engineering | Expected Graduation: 2029–2030
